Seitzberger Display

Ihr Partner für erstklassige Qualität

Seitzberger Display produziert schallabsorbierende Elemente aus recyceltem Akustikfilz für Wand-, Decken- und Möbelverkleidungen. Individualität und Qualität sind dabei großgeschrieben, denn besondere Vorstellungen bedürfen besondere Fertigungen in feinsten Ausführungen.

Vier Akustikfilz-Sortimente, **Premium** Line, **Classic** Line, **Pure** Line und **New** Line bilden mit ihren breiten Spektren an Farben und Stärken die Basis aller Akustikelemente. Auf Kundenwunsch wird Akustikvlies individuell zu 3D-Verformungen, Formteilen und Plattenware mit V-Cut oder anderen Schnittmustern in exzellenter Handarbeit gefertigt.

Die verwendeten Akustikfilze entsprechen den europäischen Brandschutzbestimmungen nach EN13501-1 | B-s1, d0 & B-s2, d0.

Fragen Sie gerne Ihren Kundenberater, Manuel Heigl, nach kostenlosen Mustern, Farbfächern und weiteren Informationen.

Materialeigenschaften

- Gute dreidimensionale Verformbarkeit
- Geringes Gewicht
- Schallreduzierend
- Schwer entflammbar
- Schimmelresistent
- Durchgefärbt
- Robust, formstabil und langlebig
- Angenehme Haptik
- Große Farbenvielfalt
- Vielfältige Anwendungen

Einsatzbereiche

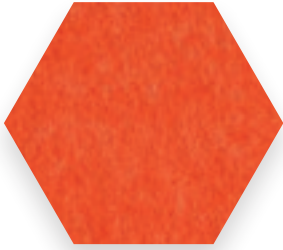

- Konferenzräume
- Eingangshallen
 - Büros
 - Konzertsäle
- Interior Design
- Hängeelemente
 - Wandpaneele
 - Tischaufsätze
- Rasterdeckeneinleger
- Dekorelemente, u.v.m.

Konfektionsmöglichkeiten

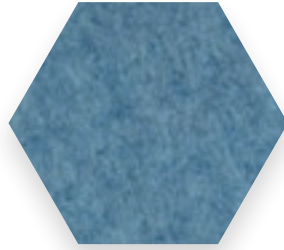

- zugeschnitten
- 3D verformt
- bedruckt
- V-Cut oder andere Schnittmuster

Reinigungshinweise

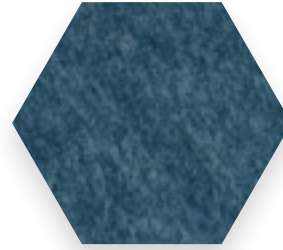

- Absaugbar mit einer glatten Bürste
- Abwischbar mit einem feuchten Tuch
